PROFESSIONAL SUMMARY

Junior Backend .NET Developer and third-year Computer Science student with hands-on experience building secure and scalable web applications using ASP.NET Core (MVC & Web API) and SQL Server. Strong understanding of SOLID principles, layered architecture, DTO pattern, JWT authentication, and role/policy-based authorization. Experienced in integrating payment systems and implementing secure API architectures. Passionate about backend development and writing clean, maintainable code.

TECHNICAL SKILLS

ASP.NET Core | Web API | C# | SQL Server | EF Core | LINQ | JWT | Authentication & Authorization | SOLID | DTOs | Stripe | Git

PROJECTS

E-COMMERCE WEB APPLICATION| (MVC → Web API Refactoring) Dec 2025

Built a secure and scalable E-Commerce backend system using ASP.NET Core and SQL Server. Implemented JWT authentication, role/policy-based authorization, Stripe payment integration, OTP verification, and full CRUD operations following SOLID principles and layered architecture.

- Built a modular E-Commerce system using Areas (Admin, Customer, Identity).
- Implemented full CRUD operations for Products, Categories, Brands, Cart, and Payments.
- Applied SOLID principles and layered architecture.
- Refactored MVC into RESTful Web API using DTOs instead of ViewModels.
- Implemented JWT authentication with token generation per user.
- Applied Role-Based and Policy-Based Authorization.
- Implemented OTP verification and Email Confirmation workflow.
- Integrated Stripe payment gateway.
- Created Database Initializer Service for seeding roles and default admin.
- Documented APIs using Scalar.

CINEMA MANAGEMENT SYSTEM| (In Progress) Jun 2026 – Fep 2026

Developed a scalable Cinema Management backend system using ASP.NET Core and SQL Server. Implemented role-based authentication, structured DTO-based data transfer, and designed RESTful API endpoints for movie management and ticket booking.

- Developing backend system for managing Movies, Cinemas, Showtimes, and Ticket Booking.
- Implementing authentication and role management.
- Designing scalable RESTful API endpoints for frontend/mobile integration.
- Applying DTO pattern and layered architecture.

EDUCATION

- Bachelor of Computer Science
- Cairo Higher Institute of Engineering, Computer Science and Management
- Expected Graduation: 2027
- Grade: Good

COURSES

Backend .NET Development Program
Eraa Soft

- Built real-world projects using ASP.NET Core
- Implemented JWT Authentication and Role-Based Authorization
- Integrated Stripe Payment Gateway
- Designed RESTful APIs using DTO pattern
