PROFESSIONAL SUMMARY

Backend .NET Developer with strong hands-on experience building scalable and secure web applications using ASP.NET Core and SQL Server. Skilled in designing RESTful APIs, implementing authentication and authorization systems, and applying clean architecture principles (SOLID, Layered Architecture, DTO pattern). Experienced in developing real-world systems across multiple domains including E-Commerce and Education.

TECHNICAL SKILLS

- **Backend:** ASP.NET Core, Web API, C#
- **Database:** SQL Server, EF Core, LINQ
- **Architecture:** SOLID Principles, Layered Architecture, DTO Pattern
- **Security:** JWT Authentication, Role-Based & Policy-Based Authorization
- **Integrations:** Stripe Payment Gateway
- **Tools:** Git, GitHub, Postman

SOFT SKILLS

- **Problem Solving & Analytical Thinking**
 - **Effective Communication & Team Collaboration**
 - **Time Management & Prioritization**
 - **Adaptability & Quick Learning**
 - **Attention to Detail & Quality Focus**
 - **Leadership & Mentoring**
-

EXPERIENCE

Backend .NET Trainee | Eraa Soft

2025

- Completed intensive backend training program focused on ASP.NET Core development
 - Built real-world backend applications using Web API and SQL Server
 - Implemented JWT authentication and role-based authorization systems
 - Integrated Stripe payment gateway in production-like scenarios
 - Designed RESTful APIs using DTO pattern and layered architecture
 - Applied SOLID principles to build scalable and maintainable systems
-

Freelance Backend Developer

2025 – Present

- Developed multiple backend systems using ASP.NET Core
 - Built RESTful APIs for E-Commerce, Student Management, and Exam Systems
 - Implemented secure authentication & authorization using JWT
 - Applied SOLID principles and layered architecture across projects
 - Designed scalable and maintainable backend solutions
-

PROJECTS

E-Commerce Web API (MVC → Web API)

 GitHub: <https://github.com/MoSayed335/Ecommerce>

- Designed and developed a scalable E-Commerce backend using ASP.NET Core
- Built 10+ RESTful API endpoints for Products, Categories, Cart, and Orders
- Implemented JWT authentication with refresh tokens and secure token lifecycle management

- Applied role-based authorization (Admin, Customer, Guest)
 - Integrated Stripe payment gateway for secure transaction handling
 - Implemented OTP verification and email confirmation workflows
 - Developed database seeding mechanism for roles and default admin creation
 - Added logging system for tracking errors and application behavior
 - Applied SOLID principles and layered architecture
 - Refactored application from MVC to RESTful Web API using DTO pattern
-

Cinema Management System

 GitHub: <https://github.com/MoSayed335/Cinema>

- Developed backend system for managing movies, cinemas, showtimes, and bookings
 - Designed 8+ RESTful API endpoints for frontend and mobile integration
 - Implemented authentication and role-based access control
 - Integrated logging mechanism for monitoring system activities
 - Applied DTO pattern and layered architecture for scalability
-

Student Management System

 GitHub: https://github.com/MoSayed335/Student_Manegment_System

- Built backend system for managing students, departments, and academic records
 - Designed relational database using SQL Server with structured entity relationships
 - Developed CRUD APIs across multiple modules (Students, Departments, Courses)
 - Optimized data access using EF Core and LINQ
-

Student Exams System

 GitHub: https://github.com/MoSayed335/Exams_Manegment_System

- Developed system for managing exams, results, and student performance

- Designed database schema for exams, subjects, and grading workflows
 - Built API endpoints for exam submission, evaluation, and result tracking
 - Structured system for handling multiple exam scenarios
-

Todo List API (MVC)

 GitHub: <https://github.com/MoSayed335/ToDoList>

- Built lightweight task management API using ASP.NET Core
 - Developed 5+ endpoints for task CRUD operations
 - Applied clean code practices and structured API design
-

KEY ACHIEVEMENTS

- Built multiple production-like backend systems
 - Implemented secure authentication & authorization systems
 - Integrated real-world payment system (Stripe)
 - Designed scalable RESTful APIs across different domains
-

EDUCATION

Bachelor of Computer Science

Cairo Higher Institute

Expected Graduation: 2027
